Portfolio: sruthikondiparthi.github.io

PROFESSIONAL SUMMARY

Technical Product Manager with 7+ years of backend engineering experience and hands-on product ownership across AI-driven workflow products. Experienced in product discovery, MVP scoping, user research, and API-driven systems. Built end-to-end AI products focused on simplifying complex workflows through user-centered design and backend architecture. Interested in fintech, payments, integrations, and backend-driven platforms.

SKILLS

Product: Product Discovery · OKRs · MVP · User Research · Agile

Technical: Python · FastAPI · SQL · REST APIs · PostgreSQL · Flutter

Systems: API Design · Backend & Workflow Systems · LLM Integration

Tools: Jira · Miro · Figma · Slack

PRODUCT EXPERIENCE

Bureaucratic Guidance App

Product Manager & Developer | 2025–Present

- Conducted 10 user interviews and validated MVP workflows with 15 participants
- Defined product scope, onboarding flows, and OKRs for AI-assisted relocation support
- Prioritized guided workflows over automation to reduce onboarding friction and confusion
- Introduced AI-powered document scanner feature based on user feedback and usability testing
- Built API-driven backend workflows using Flutter, FastAPI, Firebase, and AI integrations

AI-Powered Job Application Assistant

Product Manager & Developer | 2025–Present

- Built AI-powered platform for resume generation, JD analysis, and interview preparation
- Designed API-driven backend architecture using FastAPI and LLM integrations
- Defined and tested dual onboarding approaches (resume-first vs JD-first workflows)
- Conducted user validation sessions to improve application clarity and confidence
- Prioritized interview preparation features based on recurring user pain points

PROFESSIONAL EXPERIENCE

Software Developer — Studio Hamburg MCI GmbH

2016 – 2018 · Hamburg, Germany

- Owned feature improvements for internal planning product ("Plato")
- Translated business requirements into backend features (AutoCAD workflows)
- Collaborated cross-functionally; improved efficiency by ~30%

Senior Software Engineer — Motorola India Pvt. Ltd

2009 – 2011 · Hyderabad, India

- Evaluated feasibility and contributed to system design for LTE products
- Built backend systems and integrated network protocols (SOAP, SNMP, TCP/IP)
- Improved system stability through debugging and root cause analysis

Software Engineer — Motorola India Pvt. Ltd

2006 – 2009 · Hyderabad, India

- Developed backend systems for network management and predictive text (iTap)
- Worked on cross-platform integration and performance optimization
- Resolved production issues and supported release cycles

Systems Analyst — Convergys

2005 – 2006 · Hyderabad, India

- Built backend functionality for telecom billing systems
- Improved system reliability through production issue analysis
- Collaborated with cross-functional teams across development and testing

CAREER BREAKS

Family Phase (2019–2024)

Focused on family responsibilities while continuing technical upskilling in Python, APIs, and backend systems. Built several hands-on backend projects to stay current with modern development practices.

Relocation to Germany (2011–2016)

Integration, language learning, and preparation for the German job market.

This sounds much cleaner and more intentional.

EDUCATION

M.Tech – Computer Science & Engineering

Jawaharlal Nehru Technological University, India

2006 – 2009 · Grade: 82% (“very good”)

B.Tech – Computer Science & Engineering

Acharya Nagarjuna University, India

2000 – 2004 · Grade: 81.5% (“very good”)

CERTIFICATIONS

- Product Management Bootcamp — Digitale Leute (2025)
- IBM Full Stack Developer Certification (2024)
- German B2 — Deutsch Test für den Beruf (2024)

LANGUAGES

German — B2

English — Fluent

Telugu — Native
