Professional Summary

Junior Product Manager with 1+ year of hands-on product experience (Digitale Leute Bootcamp, 2025) and 7+ years of backend engineering. Built AI-driven products end-to-end with a focus on APIs, workflows, and system design. Strong in product discovery, OKRs, and translating complex systems into user-focused solutions. Interested in fintech, payments, integrations, and backend-driven products.

Skills

Product: Product Discovery · OKRs · MVP · User Research · Agile
Technical: Python · FastAPI · SQL · REST APIs · PostgreSQL
Systems: API Design · Workflow Systems · LLM Integration
Tools: Jira · Miro · Figma · Slack

Product Experience

AI Expat Workflow Assistant
Product Manager & Developer | 2025–Present

- Conducted 10 user interviews and validated MVP with 15 participants
- Defined product scope, workflows, and OKRs for relocation platform
- Prioritized guided workflows over automation to reduce user friction
- Introduced document scanner feature based on user feedback

AI Application Preparation Engine
Product Manager & Developer | 2025–Present

- Built AI system for resume generation, gap analysis, and interview prep
- Designed API-driven backend using FastAPI + LLM integrations
- Created dual user flows (resume-first vs job-description-first)
- Validated with users, improving clarity and confidence

Professional Experience

Software Developer — Studio Hamburg MCI GmbH
2016 – 2018 · Hamburg, Germany

- Owned feature improvements for internal planning product ("Plato")
- Translated business requirements into backend features (AutoCAD workflows)
- Collaborated cross-functionally; improved efficiency by ~30%

Senior Software Engineer — Motorola India Pvt. Ltd
2009 – 2011 · Hyderabad, India

- Evaluated feasibility and contributed to system design for LTE products
- Built backend systems and integrated network protocols (SOAP, SNMP, TCP/IP)
- Improved system stability through debugging and root cause analysis

Software Engineer — Motorola India Pvt. Ltd
2006 – 2009 · Hyderabad, India

- Developed backend systems for network management and predictive text (iTap)
- Worked on cross-platform integration and performance optimization
- Resolved production issues and supported release cycles

Systems Analyst — Convergys
2005 – 2006 · Hyderabad, India

- Built backend functionality for telecom billing systems
- Improved system reliability through production issue analysis
- Collaborated with cross-functional teams across development and testing

CAREER BREAKS

Family Phase (2019–2024)
Focused on family responsibilities while continuing technical upskilling in Python, C++, Linux, and debugging. Built several hands-on backend projects to stay current with modern development practices.

Relocation to Germany (2011–2016)
Integration, language learning, and preparation for the German job market.

EDUCATION

M.Tech – Computer Science & Engineering
Jawaharlal Nehru Technological University, India
2006 – 2009 · Grade: 82% ("very good")

B.Tech – Computer Science & Engineering
Acharya Nagarjuna University, India
2000 – 2004 · Grade: 81.5% ("very good")

CERTIFICATIONS

- Product Management Bootcamp — Digitale Leute (2025)
- IBM Full Stack Developer Certification (2024)
- German B2 — Deutsch Test für den Beruf (2024)

LANGUAGES

German — B2
English — Fluent
Telugu — Native

STRENGTHS

Analytical Thinking · Structured Problem Solving · Ownership System Thinking · Debugging · Cross-functional Collaboration
